Projects

Phone Cleaner App (2026)

Remove junk files, clear cache, free up storage, and keep your device running fast with powerful AI cleaning technology.

Universal Remote App (2026)

A Flutter-based mobile app that enables users to control multiple smart devices from a single interface. Features quick device pairing, remote controls, and a user-friendly experience.

Copy My Data App (2026)

Fast cross-device data transfer (contacts, media, files) over WiFi with secure local communication.

Kindergarten App (2025)

School management system with role-based access, attendance tracking, and real-time updates.

Mobile Octane (2025)

Fuel delivery app with user/admin modules, order handling, and backend integration.

InDrive Clone (2024)

Ride-hailing app with booking, fare negotiation, and real-time tracking using Firebase.

Motimate AI Fitness (2024)

AI-based diet and workout planner using APIs with personalized recommendations.

Quran App (2024)

Audio recitation, translation, bookmarks, and Firebase-backed content management.

Harroof (2024)

Bookstore app with search, recommendations, and secure payment integration.

Wholesale Grocery App (2022)

Dual-role eCommerce app with ordering system and admin management panel.

Skills

Flutter, Dart, Firebase, REST APIs, GetX, Provider, Git, Dio

Education

BS Software Engineering - University of Lahore (2019 - 2023)
